- Stop Speaker Distortion
- Get More Bass

## FOR USE THROUGHOUT YOUR VEHICLE INTERIOR

Trunk

Doors

Floor

Dynamat SuperLite is for the vehicle owner who wants a quiet, solid ride, while keeping weight to a minimum. SuperLite can be used for full coverage on your vehicle's interior or just in problem areas of high sound resonance. The flexible, low-density synthetic core creates dynamic motion energy conversion to silence your vehicle interior. It is a thin, easy to install, super-sticky, space age plastic, bonded to an alloy skin that converts noise causing vibration

into silent energy. Use it on doors, floor, roof, hood and trunk for a really quiet and incredibly solid ride.
